EDUCATION

TechnoLAB – ISTA

Bamako, Mali

Bachelor of Computer Science – Computer Systems and Networks

July 2024

CGPA: 14.44/20

Relevant Coursework: Cisco CCNA2 Certification, Applied Mathematics, Logical Mathematical, Practical Work Networks/Security, Introduction to VSAT/GSM

ERPIE

Bamako, Mali

Associate's Degree of Computer Engineering

July 2023

CGPA: 16.32/20

Relevant Coursework: Signal Treatment, Analog/Digital Electronics, Mobile Network Architecture, Access Networks, Arithmetic and Cryptography

SKILLS

Programming Languages: HTML/CSS, JavaScript, C, C++, Python, MySQL

Operating Systems: Linux (Ubuntu, Debian, Kali Linux), Windows (10,11), macOS

Network: TCP/IP, DNS, DHCP, VPNs, Firewalls, IDS/IPS

Software: Visual Studio Code, Git, Cisco Packet Tracer, Code:Blocks, VirtualBox

Languages: *Fluent-French; Native Speaker-Bambara*

INTERNSHIP EXPERIENCE

United Bank for Africa

Bamako, Mali

Intern IT Support

May 2025 – August 2025

- Provided technical support to bank staff by resolving connectivity and IT issues, ensuring minimal downtime and uninterrupted operations.
- Activated and managed BitLocker encryption on staff devices, strengthening data protection and compliance with security policies.
- Configured and supported remote access tools (Zscaler, Cisco AnyConnect VPN) and Western Union accounts with security certificates, enabling secure and efficient remote banking operations.

American International Group

New York, United States – Virtual

Security Analyst Intern

February 2025 – March 2025

- Conducted cybersecurity threat analysis for the Cyber Defense Unit, maintaining awareness of CISA advisories and emerging vulnerabilities.
- Investigated real-world threats, identifying vulnerabilities and evaluating their potential impact on enterprise infrastructure.
- Developed a Python-based ethical hacking script simulating brute-force attacks on encrypted files to enhance incident response testing.

Mastercard

Purchase, United States – Virtual

Security Analyst Intern

September 2024 – November 2024

- Evaluated threat intelligence reports to identify security gaps and recommend targeted employee training initiatives.
- Contributed to the development of security awareness strategies, tailoring cybersecurity training programs for diverse business units.
- Analyzed and proposed enhancements to security protocols, with a focus on improving phishing prevention and incident response workflows.

ACADEMIC PROJECTS		
TechnoLAB-ISTA	Bamako, Mali	
Local Area Network Design and Implementation	March - July 2024	
- Designed a scalable Local Area network architecture using TCP/IP addressing, VLAN segmentation, and hierarchical switching, resulting in improved network performance and reliable device communication - Implemented and configured routers, switches, DHCP, and NAT services, ensuring automated IP management and seamless internal/external connectivity. - Analyzed and improved network traffic using Wireshark and Cisco Packet Tracer, achieving efficient data flow and reduced network congestion.		
ERPIE	Bamako, Mali	
Enterprise Network, Security and Automation	April – July 2023	
- Designed and secured an enterprise network using Cisco, VLANs, firewalls, VPN, and ACLs, ensuring strong access control and network protection. - Automated network configuration and management with Python and Ansible, resulting in reduced human error and faster operations. - Implemented Sophos firewall monitoring, enabling real-time threat detection and improved security visibility.		
ERPIE	Bamako, Mali	
Study of Parameters Influencing the Efficiency of Optical Telecommunications	July 2022 - January 2023	
- Analyzed optical transmission factors such as attenuation, chromatic dispersion, and nonlinearities, improving understanding of signal degradation. - Evaluated and optimized network performance using low-loss fibers and wavelength adjustments, enhancing transmission reliability. - Recommended strategies to maximize optical network efficiency, resulting in more robust and high-performance communications.		
PROFESSIONAL ORGANIZATIONS AND EXTRACURRICULAR ACTIVITIES		
Athlete, Track and Field, Volleyball – Centre Omnisport de Lafiabougou (COL)	October 2024 - Present	
Member, Institute of Electrical and Electronic Engineers (IEEE)	July 2024 – Present	
Member, American Center Bamako	September 2022 – Present
